Accoya® and JM Teare

what is Accoya® wood?

Accoya® wood is produced from sustainably sourced, fast growing wood using a non-toxic modification process from the surface to the core.

The result: a durable, dimensionally stable and beautiful material with the performance characteristics of the most durable tropical hardwoods, but offering industry-leading environmental credentials.

Accoya® is helping to protect the world's precious hardwood resources and is guaranteed for 50 years in exterior use and 25 years when used in the ground. This long life also provides an added benefit – helping to reduce carbon emissions.

JM Teare

We manufacture a wide range of items from traditional box sash to modern solid frame sliding sash windows, traditional casements, modern storm proof casements, doors and entranceways, conservatories / roof lanterns, staircases and individual items of furniture.

Accoya®

WOOD WITHOUT COMPROMISE

OUTSTANDING DURABILITY
